Laudato Si’
Reflection Resource:
On Care for Our Common Home

Praise be to you, my Lord, through our Sister, Mother Earth
St. Francis of Assisi
To the Convener

The convener should be familiar with the Encyclical and have a copy on a center table. S/he is responsible to prepare (or to ask someone to prepare) anything needed. Convener times the meeting to provide the greatest benefit to all.

In keeping with the spirit of the document, before the first meeting assist group members to simplify their transportation to meetings; make copies on sustainable paper using both sides; avoid staples; use water pitchers and glasses to avoid use of plastic water bottles; use books or share papers to avoid duplicating extra pages for hymns.

For the first meeting, have all 8 pages at the place of each participant. As each arrives, suggest s/he look through the Encyclical on the table or scan this resource.

Week One: Our Sister, Mother Earth - Introduction

Convener: Welcome to this first of five meetings on Pope Francis’ Encyclical Laudato Si’. Sessions consist primarily of quotes from Laudato Si’, which are in italics, followed by paragraph numbers. Pope Francis writes: I would like to enter into dialog with all people about our common home. (3) We are here to do that, and to prayerfully reflect on and respond to this Encyclical. The quotes selected for use here cannot substitute for the entire text of 246 paragraphs. Do read it all.

The Encyclical contains a brief introduction and six chapters. Because the foundation is so important, Week One focuses on the Introduction (par. 1 - 16). It grounds readers in a cosmological setting with St. Francis’ belief that our common home is like a sister with whom we share our life and a beautiful mother who opens her arms to embrace us. (1) The Encyclical cannot be adequately understood apart from this introduction.

Scripture is taken from Eugene H. Peterson’s The Message: The Bible in Contemporary Language. It is rarely used for liturgies. Please tell someone if you cannot attend any meeting, so the group will not wait for you. If the group wants refreshments, decide how to supply them.

Share: Introduce yourself and share why you chose to participate. [about 10 min.]

View “Canticle of the Creatures,” 3:28 min.: Google: Seescapes: Sacred Earth (top left) or: Read St. Francis’ Canticle of Creation.

Prayer: All: Loving Creator Spirit, we ask that the spirit of Christ and of St. Francis be present in our hearts and minds as we ponder what Pope Francis has written. [Silent prayer about 1 - 2 min.] All: Praise be to you, my Lord, through our Sister, Mother Earth, who sustains and governs us, and who produces various fruit with colored flowers and herbs. (1)
Read in turn: Encyclicals are official, public letters from the Pope that have authority in the Church second only to teaching defined as dogma.

Cardinal Peter Turkson, who wrote the initial draft of the encyclical letter with his team, describes it as a “prayerful meditation,” not a theological, scientific, or policy paper.

Pope Francis includes statements from past saints and popes who have spoken of the interdependence of creation and for a global ecological conversion [John Paul II]. (5)

Read from Laudato Si’ - Introduction:

We have forgotten that we ourselves are dust of the earth (cf. Gen 2:7); our very bodies are made up of her elements, we breathe her air and we receive life and refreshment from her waters. (2)

Authentic human development has a moral character. It presumes full respect for the human person, but it must also be concerned for the world around us and “make into account the nature of each being and of its mutual connection in an ordered system.” [John Paul II] (5)

“… It is our humble conviction that the divine and human meet in the slightest detail in the seamless garment of God’s creation, in the last speck of dust of our planet.” [Patriarch Bartholomew] (9)

[St. Francis] shows us just how inseparable the bond is between concern for nature, justice for the poor, commitment to society, and interior peace. (10)

If we approach nature and the environment without this openness to awe and wonder, if we no longer speak the language of fraternity and beauty in our relationship with the world, our attitude will be that of masters, consumers, ruthless exploiters, unable to set limits on their immediate needs. … The poverty and austerity of St. Francis were no mere veneer of asceticism, but something much more radical: a refusal to turn reality into an object simply to be used and controlled. (11)

Rather than a problem to be solved, the world is a joyful mystery to be contemplated with gladness and praise. (12)

The urgent challenge to protect our common home includes a concern to bring the whole human family together to seek a sustainable and integral development, for we know that things can change. (13)
Pause to reflect on quotes, then share any quote that surprised you, cheered you, annoyed you, confused you, or drew you to later contemplation and/or learning. Explain. [about 15 - 25 min.]

Read from Scripture:
Deut. 26:8: God brought us to this place, gave us this land flowing with milk and honey.
Ps. 91:1: You who sit down in the Holy God’s presence …
Rom. 10:10: The word that saves us is right here, as near as the tongue in your mouth, as close as the heart in your chest.

Share: How might you connect the Scripture readings with the Encyclical quotes?

For Next Week: Be open to awe and wonder as you experience life this week. Take at least one special moment to be aware that you are always in the presence of the Holy. You’ll share this next week. Read Introduction and Chapter One, par. 1 - 61.

Prayer
Litany response: … may our hearts be open in love.

To treating our common home like a sister with whom we share our life and a beautiful mother who opens her arms to embrace us (1), …

To remembering that our very bodies are made up of [Earth’s] elements, we breathe her air and we receive life and refreshment from her waters (2), …

To imitating the example of St. Francis who was particularly concerned for God’s creation and for the poor and the outcast . . . a mystic and a pilgrim who lived in simplicity and in wonderful harmony with God, with others, with nature and with himself (10), …

To feeling intimately united with all that exists [so that] sobriety and care will well up spontaneously (11), …

To honoring the intimate relationship between the poor and the fragility of the planet, the conviction that everything in the world is connected (16), …

To those who reject or even mock the entire Encyclical …

Week Two: What Is Happening to Our Common Home

Share: If needed, welcome newcomers; review names. Share one experience or insight each had during the week that relates to awe, wonder, and finding the divine in creation.

View “Laudato Si’,” www.youtube.com/watch?v=1tYdOlqvpqq (6 min.) or sing: “How Great Thou Art,” Stuart K. Hine, or a similar hymn

Prayer: All: Loving Creator Spirit, we ask that the spirit of Christ and of St. Francis be present in our hearts and minds as we ponder what Pope Francis has written. [Silent prayer] All: Praise be to you, my Lord, through our Sister, Mother Earth, who sustains and governs us, and who produces various fruit with colored flowers and herbs. (1)

Read in turn: Pope Francis writes as the science-educated Catholic pontiff he is, who has spent his life studying and contemplating Scripture, and who is alive to the unity of all. He is especially concerned about the poorest members of our common home with whom we are all united. To interpret Laudato Si’ as affirming one political and/or economic system is not to have read it or not to understand its depth and scope.

Thanks to the Hubble telescope, scientists estimate that our evolving observable universe contains 170 - 200 billion galaxies, each with billions of stars.

Sometimes denial of climate change and other problems highlighted in this Encyclical results from limited geographical or social experience and/or a sense of being separate from the rest of creation.

Read from Laudato Si’ - Chapter One
Climate change is a global problem with grave implications: environmental, social, economic, political and for the distribution of goods. It represents one of the principal challenges facing humanity in our day. (25)

There has been a tragic rise in the number of migrants seeking to flee from the growing poverty caused by environmental degradation. … Sadly, there is widespread indifference to such suffering, which is even now taking place throughout our world. (25)

Our world has a grave social debt toward the poor who lack access to drinking water … there is little awareness of the seriousness of such behavior within a context of great inequality. (30)

A sober look at our world shows that the degree of human intervention, often in the service of business interests and consumerism, is actually making our earth less rich and beautiful, ever more limited and grey, even as technological advances and consumer goods continue to abound limitlessly. (34)
Because all creatures are connected, each must be cherished with love and respect, for all of us as living creatures are dependent on one another. (42)

The human environment and the natural environment deteriorate together; we cannot adequately combat environmental degradation unless we attend to causes related to human and social degradation. (48)

It needs to be said that, generally speaking, there is little in the way of clear awareness of problems which especially affect the excluded. Yet they are the majority of the planet’s population, billions of people. (49)

People may well have a growing ecological sensitivity but it has not succeeded in changing their harmful habits of consumption … (55)

Economic powers continue to justify the current global system where priority tends to be given to speculation and the pursuit of financial gain, which fail to take the context into account, let alone the effects on human dignity and the natural environment … environmental deterioration and human and ethical degradation are closely linked. (56)

This is the way human beings contrive to feed their self-destructive vices: trying not to see them, trying not to acknowledge them, delaying the important decisions and pretending that nothing will happen. (59)

Reflect, then Share any quote that surprised you, cheered you, annoyed you, confused you, or drew you to later contemplation and/or learning. Explain.

Read from Scripture:
Gen. 15: 5: [Abram’s messenger ] took him outside and said: Look at the sky. Count the stars. Can you do it?
Ps. 27: 13: I’m sure now I’ll see God’s goodness in the exuberant earth.
Phil. 3:17: There are many out there taking other paths, choosing other goals …

Share: How might you connect the Scripture readings with the Encyclical quotes?

For Next Week: Prepare to share one fact, with source, concerning global pollution, climate change, water conditions, biodiversity, or global inequality.
Read Chapters Two and Three, par. 62 - 136.

Prayer
Litany response: … may we, indeed!

That we may judge decisions, systems, and laws by how they affect the common good [and] integral and sustainable human development (18), …
That we may develop policies so that, in the next few years, the emission of carbon dioxide and other highly polluting gases can be drastically reduced, for example, substituting for fossil fuels and developing sources of renewable energy (26), …

That we may support lifestyles and policies that protect fresh drinking water, an issue of primary importance, since it is indispensable for human life and for supporting terrestrial and aquatic ecosystems (28), …

That we may stop plundering earth’s resources because of short-sighted approaches to the economy, commerce and production (32), …

That we may always consider the effects on people’s lives of environmental deterioration, current models of development and the throwaway culture (43), …

**Closing**

---

**Week Three: The Gospel of Creation and The Human Roots of the Ecological Crisis**

**Share:** Share one fact, and its source, concerning global pollution, climate change, water conditions, biodiversity, or global inequality.

**View** Bishop-elect Robert Barron on Pope Francis’ Encyclical *Laudato Si’* - YouTube, June 19, 2015 (3:40)

**Prayer:** All: Loving Creator Spirit, we ask that the spirit of Christ and of St. Francis be present in our hearts and minds as we ponder what Pope Francis has written. [Silent prayer] All: Praise be to you, my Lord, through our Sister, Mother Earth, who sustains and governs us, and who produces various fruit with colored flowers and herbs. (1)

**Read in turn:**

The “dust” that we are results from hydrogen and helium that date to about 13.8 billion years ago. “Star-stuff” became Planet Earth about 4.5 billion years ago, and eventually birds, monkeys, music, and laughter. Homo sapiens has been part of it for c. 200,000 years.
Anthropocentrism is the “ism” that places humans as separate from, and above, the rest of creation, regarding humans as the central and most important element of creation.

**Read from *Laudato Si’* - Chapters Two and Three**

... we must forcefully reject the notion that our being created in God’s image and given dominion over the earth justifies absolute domination over other creatures. (67)

These ancient [Bible] stories, full of symbolism, bear witness to a conviction which we today share, that everything is interconnected, and that genuine care for our own lives and our relationships with nature is inseparable from fraternity, justice, and faithfulness to others. (70)

We can say that “alongside revelation properly so-called, contained in sacred Scripture, there is a divine manifestation in the blaze of the sun and the fall of the night.” [Catechesis] (85)

The Christian tradition has never recognized the right to private property as absolute or inviolable, and has stressed the social purpose of all forms of private property. (93)

Never has humanity had such power over itself, yet nothing ensures that it will be used wisely, particularly when we consider ... nuclear bombs dropped in the middle of the twentieth century, or the array of technology which Nazism, Communism and other totalitarian regimes have employed to kill millions of people, to say nothing of the increasingly deadly arsenal of weapons available for modern warfare. (104)

To seek only a technical remedy to each environmental problem ... is to separate what is in reality interconnected and to mask the true and deepest problems of the global system. (111)

An authentic humanity, calling for a new synthesis, seems to dwell in the midst of our technological culture, almost unnoticed, like a mist seeping gently beneath a closed door. (112)

We should not think that political efforts or the force of law will be sufficient to prevent actions which affect the environment because, when the culture itself is corrupt and objective truth and universally valid principles are no longer upheld, then laws can only be seen as arbitrary impositions or obstacles to be avoided. (123)

The expansion of [Genetically Modified] crops has the effect of destroying the complex network of ecosystems, diminishing the diversity of production and affecting regional economies, now and in the future. In various countries, we see an expansion of oligopolies ... This dependency would be aggravated were the production of infertile seeds to be considered ... (134)
Reflect, then Share any quote that surprised you, cheered you, annoyed you, confused you, or drew you to later contemplation and/or learning. Explain.

Read from Scripture:
Exod. 3: 5: God said: … Remove your sandals from your feet. You’re standing on holy ground.
Lk. 13:8-9: The gardener said: Let’s give it another year. I’ll dig around it and fertilize, and maybe it will produce next year . . . .

Share: How might you connect the Scripture readings with the Encyclical quotes?

For Next Week: Prepare to share how you envision the “authentic humanity” Pope Francis mentions in par. 112.
Read Chapters 4 and 5, par. 137 - 201.

Prayer
Litany response: … Christ, help us.

That Christians will realize that their responsibility within creation, and their duty toward nature and the Creator, are an essential part of their faith (64), …

That human beings, endowed with intelligence, [will] respect the laws of nature and the delicate equilibria existing between the creatures of this world (68), …

That we can see God reflected in all that exists [so that] our hearts are moved to praise the Lord for all his creatures and to worship him in union with them (87), …

That we will recognize that Everything is connected, and Concern for the environment thus needs to be joined to a sincere love for our fellow human beings and an unwavering commitment to resolving the problems of society (91), …

That we may slow down and look at reality in a different way, to appropriate the positive and sustainable progress which has been made, but also to recover the values and the great goals swept away by our unrestrained delusions of grandeur (114), …

That all those directly or indirectly affected . . . can make known their problems and concerns, and have access to adequate and reliable information in order to make decisions for the common good, present and future (135), …

Closing
Sing (and dance?): “Canticle of the Sun,” (The Heavens Are Telling) Marty Haugen: YouTube, uploaded by Michelle Sherliza, OP [3:31] or sing without video

Exchange a sign of peace. Socialize however the group decides.
Week Four: Integral Ecology and Lines of Approach and Action

Share: How do you envision the “authentic humanity” Pope Francis mentions in par. 112?

View “Meditation on Laudato Si’,” 4:43 min: http://www.csjthewell.org/meditation-on-pope-francis-environmental-encyclical/
or sing: “How Great Thou Art,” Stuart K. Hine, or a similar hymn

Prayer: All: Loving Creator Spirit, we ask that the spirit of Christ and of St. Francis be present in our hearts and minds as we ponder what Pope Francis has written. [Silent prayer] All: Praise be to you, my Lord, through our Sister, Mother Earth, who sustains and governs us, and who produces various fruit with colored flowers and herbs. (1)

Read in turn:
Ecosystems are comprised of interacting and interdependent organisms and their physical environment that developed mutually enhancing relationships over time. Thich Nhat Hanh [Tik N'yat Hawn] calls it “interbeing.”

Critics who complain that Pope Francis should stick to matters of faith and doctrine, or not get into science, politics, and economy, display the compartmentalized thinking the Pope is asking us to grow beyond. Everything is interconnected and cannot be “stuck to” separately. Not to act is as political as acting.

Read from Laudato Si’ - Chapters Four and Five

It cannot be emphasized enough how everything is interconnected. Time and space are not independent of one another, and not even atoms or subatomic particles can be considered in isolation. (138)

The imposition of a dominant lifestyle linked to a single form of production can be just as harmful as the altering of ecosystems. (145)

… the principle of the common good immediately becomes … a summons to solidarity and a preferential option for the poorest of our brothers and sisters. (158)

Unless we struggle with [the world’s general direction, its meaning and its values], I do not believe that our concern for ecology will produce significant results. (160)
… a growing conviction that our planet is a homeland … motivates us to ensure that solutions are proposed from a global perspective, and not simply to defend the interests of a few countries. (164)

As the bishops of Bolivia have stated, “the countries which have benefited from a high degree of industrialization, at the cost of enormous emissions of greenhouse gases, have a greater responsibility for providing a solution to the problems they have caused.” (170)

Enforceable international agreements are urgently needed … Relations between states must be respectful of each others’ sovereignty, but must also lay down mutually agreed means of averting regional disasters which would eventually affect everyone. (173)

True statecraft is manifest when, in difficult times, we uphold high principles and think of the long-term common good. (178)

… we know that water is a scarce and indispensable resource and a fundamental right which conditions the exercise of other human rights. This indisputable fact overrides any other assessment of environmental impact on a region. (185)

… only when “the economic and social costs of using up shared environmental resources are recognized with transparency and fully borne by those who incur them, not by other peoples or future generations,” [Benedict XVI, 2009] can those actions be considered ethical. (195)

Reflect, then Share any quote that surprised you, cheered you, annoyed you, confused you, or drew you to later contemplation and/or learning. Explain.

Read from Scripture:
Ps. 34: 2: I live and breathe God.
2 Cor. 5: 17: We look inside, and what we see is that anyone united with the Messiah gets a fresh start, is created anew.

Share: How might you connect the Scripture readings with the Encyclical quotes?

For Next Week: Read Suggested Actions on p. 15. Prepare to share the one you feel would make the greatest difference for our common home if you did it.
Read Chapter 6, par. 202 - 246 and prayers.

Prayer
Litany response: … may we be blessed with courage.

That we will deepen our understanding that nature cannot be regarded as something separate from ourselves or as a mere setting in which we live (139), …
That we will show special care for indigenous communities and their cultural traditions (146), …

That we will not only keep the poor of the future in mind, but also today’s poor (162), …

That we may continue to hope that humanity at the dawn of the twenty-first century will be remembered for having generously shouldered its grave responsibilities (165), …

That we may create a politics which is far-sighted and capable of a new, integral and interdisciplinary approach to handling the different aspects of the crisis (197), …

That we leave room for aesthetic sensibility, poetry, or even reason’s ability to grasp the ultimate meaning and purpose of things [Lumen Fidei] (199), …

Closing
Sing: “We Are Called to Act with Justice,” David Haas, or a similar hymn

Exchange a sign of peace. Socialize however the group decides.

Week Five: Ecological Education and Spirituality

Share the one thing you (alone or with others) could do to make the greatest difference for our common home. Explain. (There is no one correct answer.)

(No video this week.) Sing “The Cry of the Poor,” John Foley, SJ, or a similar hymn

Prayer: All: Loving Creator Spirit, we ask that the spirit of Christ and of St. Francis be present in our hearts and minds as we ponder what Pope Francis has written. [Silent prayer] All: Praise be to you, my Lord, through our Sister, Mother Earth, who sustains and governs us, and who produces various fruit with colored flowers and herbs. (1)

Read in turn:
There is no “away” to throw things to.

Scientists at Rensselaer Polytechnic Institute reported in 2011 that once 10 percent of a population is committed to an idea, it inevitably becomes the prevailing opinion. Further research is being done on this theory. Global population is 7 billion. Do the math.

Read from Laudato Si’ - Chapter Six

Many things have to change course, but it is we human beings above all who need to change. We lack an awareness of our common origin, of our mutual belonging, and of a future to be shared with everyone … [which] would enable the development of new convictions, attitudes and forms of life. A great cultural, spiritual and educational
challenge stands before us, and it will demand that we set out on the long path of renewal. (202)

Compulsive consumerism is one example of how the techno-economic paradigm affects individuals. (203)

… our concern cannot be limited merely to the threat of extreme weather events, but must also extend to the catastrophic consequences of social unrest. Obsession with a consumerist lifestyle, above all when few people are capable of maintaining it, can only lead to violence and mutual destruction. (204)

“As never before in history, common destiny beckons us to seek a new beginning … Let ours be a time remembered for the awakening of a new reverence for life, the firm resolve to achieve sustainability, the quickening of the struggle for justice and peace, and the joyful celebration of life.” [Earth Charter] (207)

Living our vocation to be protectors of God’s handiwork is essential to a life of virtue; it is not an optional or a secondary aspect of our Christian experience. (217)

An integral ecology includes taking time to recover a serene harmony with creation, reflecting on our lifestyles and our ideals, and contemplating the Creator who lives among us and surrounds us, whose presence “must not be contrived but found, uncovered.” [Evangelii Gaudium] (225)

… along with the importance of little everyday gestures, social love moves us to devise larger strategies to halt environmental degradation and to encourage a “culture of care” which permeates all of society. (231)

Joined to the incarnate Son, present in the Eucharist, the whole cosmos gives thanks to God. Indeed the Eucharist is itself an act of cosmic love … the Eucharist is also a source of light and motivation for our concerns for the environment, directing us to be stewards of all creation. (236)

Christian spirituality incorporates the value of relaxation and festivity. … the day of rest, centered on the Eucharist, sheds its light on the whole week, and motivates us to greater concern for nature and the poor. (237)

Reflect, then Share any quote that surprised you, cheered you, annoyed you, confused you, or drew you to later contemplation and/or learning. Explain.

Read from Scripture:
Isa. 43: 18: Be alert, be present. I’m about to do something brand new. It’s bursting out! Don’t you see it?
Phil. 3: 12 - 14: I’m not saying that I have this all together … but I am well on my way, reaching out for Christ. By no means do I count myself an expert … but God beckons us onward. I’m not turning back.

Share: How might you connect the Scripture readings with the Encyclical quotes?

Prayer
Litany response: … Christ, by your holy cross, empower us!

That we will take a life-changing, or life-style changing, action to care for our common home this week, and continue during the months and years ahead …

That human beings … capable of rising above themselves will make a new start, despite their mental and social conditioning (205), …

That education in environmental responsibility [will] encourage ways of acting which directly and significantly affect the world around us, such as avoiding the use of plastic and paper, reducing water consumption, separating refuse, cooking only what can reasonably be consumed, showing care for other living beings, using public transportation or car-pooling, planting trees, turning off unnecessary lights, or any number of other practices (211), …

That we will find a mystical meaning … in a leaf, in a mountain trail, in a dewdrop, in a poor person’s face and discover the action of God in the soul and also in all things (233), …

That Mary, the Mother who cared for Jesus … [will] enable us to look at this world with eyes of wisdom (241), …

That Saint Joseph will inspire us to work with generosity and tenderness in protecting this world which God has entrusted to us (242), …

That we will respond with joy and enthusiasm to God, who calls us to generous commitment and … to find new ways forward (245), …

Reflect, then Share: What will remind you of this 5-week experience and keep you motivated? Explain.

Closing
“Go Make a Difference,” S. Angrisano and T. Tomaszek (www.youtube.com/watch?v=WDjQEOlTGzQ, or a similar hymn

Exchange blessings for the current liturgical season. Socialize however the group decides.
To implement *Laudato Si’,* change consciousness, systems, lifestyles

Read the entire document. Make a long-term commitment to implement *Laudato Si’,* no matter what the obstacles.

Collaborate with others to further *Laudato Si’.*

Deepen consciousness that you are part of creation, not separate from it, and that it is sacred. “Feel” your oneness.

Deepen love and appreciation for every aspect of creation. Express gratitude frequently.

Read the Gospels with a new appreciation of Jesus’ awareness of creation’s beauty and unity.

Learn more about the extent of climate change and other threats to our common home, the causes and possible solutions.

Urge world leaders to work together to finance the Sustainable Development Goals [http://www.smartbrief.com/tags/sdgs](http://www.smartbrief.com/tags/sdgs) and to implement pledges made for care of our common home.

Vote for candidates committed to reducing climate change and attending to “the cries of the poor.”

Lobby for city, state/province, national, and international laws and agreements that will reduce climate change and create regulations that protect the lives of all who suffer from it.

Incorporate love of Earth and Earth care into Church services, activities, and structures.

Invest and divest in accord with the goals of *Laudato Si’.* (Cf. Keep fossil fuel in the ground.)

Transition to renewable energy for home, school, church, and business.

Get accurate cosmological and climate change facts into school curricula.

Use plastic water bottles only in emergencies. Reduce consumerism and one-use-only purchases.

Reduce consumption of factory-farmed animals, especially beef.

Purchase organic, reusable, and recycled (not just recyclable) products.

Increase use of public transportation to replace car and plane use; learn to reduce emissions.

Buy organic and local produce and fair trade, organic coffee, tea, and chocolate.

Consider taking the Catholic Climate Covenant pledge: [www.catholicclimatecovenant.org](http://www.catholicclimatecovenant.org)
